

The voice of the marina industry

Marinas, Take AMI's Cost of Doing Business Survey

March 20, 2018

Marinas, take AMI's Cost of Doing Business Survey!

This year AMI is conducting a "Cost of Doing Business" survey, the first since 2000. It asks marinas to submit key financial data, so AMI can report in-depth on the health of the marina industry. Marinas that complete the survey, will receive 50% off the final Cost of Doing Business Report.

The report will provide detailed information on dockage rates; marina services and amenities; general characteristics; employee benefit data; planned capital expenditures by type, year and dollar amount; and key financial and operational ratios.

This effort is part of AMI's continued commitment to serving as the voice of the marina industry. If you would like to contribute data, please visit www.MarinaAssociation.org/AMIsurveys.

The survey closes April 27, 2018.
